It is the proctor's responsibility to assist candidates in accessing the correct exam and to ensure they have received the appropriate testing materials (i.e., Formula Conversion Table, scratch paper, individual instructions, etc.) Please consult the ***Proctor Instructions for ABC Web-Based Exams*** for important information on administering and troubleshooting the exams.

## Formula Conversion Tables

Each candidate is to be issued a Formula/Conversion Table (FCT) to reference during the exam. ABC has provided Gateway with these resources so they may be shared with any active test center. This FCT can also be accessed on ABC's website by following the link provided in below.

ABC recommends making several copies of the FCT and laminating them so they may be distributed to candidates as needed and reused for several testing sessions.
